

PREZ SEZ : **Adios** :

Well, it is that time of year when we have changed time, the elections are over, the turkey has lost and Christmas stuff is already on sale. It must be Fall or is it Winter?

At our December meeting, I will be handing over the leadership of SCARS to John Reynolds, W4TXA, your new President-elect. John is a dedicated amateur and is very capable of continuing to grow the club both in numbers and activities. Let us all congratulate and support him.

I would like to thank the SCARS membership for the outstanding support you have given me during my 2 years as President. Together with your help, we have had good eats, friendships, rekindled interest in getting on the air, educated new hams, and have grown the club membership. I could not have done it without you and hope I have lived up to your expectations. I have enjoyed my tenure as President and will continue to contribute to the club's growth the best that I can.

2016 has been a good year for the club and 2017 should be even better. Don't forget the Christmas Dinner on December 3rd and the meeting on December 6th.

73's and thank you!

Chuck, K4CGA

AM BROADCAST BAND DX CONTEST

**OH NO! He has done it again!
Congratulations John.**

K4CGA's famous receiver

What Time Is It, Really? Courtesy of Dan, W4DTO

"I decided to try to make some JT65 contacts this morning from my newly configured ham shack laptop. I quickly realized that even though I was hearing JT65 I wasn't decoding anything. I brought up <http://time.gov> in a browser and compared it to the time the JT65 app was displaying and noticed that the time on my PC was about 5 seconds off. Since JT65 is so dependent on time sync I knew that was the problem.

Apparently, the time.windows.com time servers aren't as accurate as pool.ntp.org.

Setting the time of Windows 10

"Internet Time Settings" dialog box

1. Go to **Control Panel**.
2. Search for "*Date and Time*".
3. Click on "*Set the time and date*".
4. Click on the "*Internet Time*" tab.
5. Click on "*Change settings...*".

DIGITAL BAND PLAN FOR VHF/UHF

This is NOT an official band plan but a guide for most "normal" digital activity and areas will vary in different places so please use common courtesy and if you are unsure ask local operators and or listen.....but never run digital on the SSB/CW calling frequencies or the EME subbands

6 Meters CW/SSB/Digital

50.060-50.080 CW Beacons (unattended sub-band) see: <<http://www.keele.ac.uk/depts/por/50.htm>>
50.080-50.100 CW QSO's
50.100-50.125 DX Window
50.110 DX Calling Frequency
50.125 North American SSB Calling Frequency
50.133-50.430 Voice Nets see: <<http://6mt.com/nets.htm>> <<http://www.google.com>>
50.255 FSK441 lower practical limit for most QSO's
50.260 FSK441 Calling Frequency
50.265 JT-65
50.285 FSK441 upper practical limit for most QSO's
50.290 PSK31 (USB)
50.291 PropNET <http://www.PropNET.org> (with +1500hz PSK audio)
50.293 WSPR
50.300 or 50.700 RTTY?
50.620 Packet Calling Frequency
6 Meters
50.680 SSTV

2 Meters CW/SSB/Digital

144.00-144.05 EME (CW)
144.05-144.06 Propagation beacons (old band plan)
144.06-144.10 General CW and weak signals
144.10-144.20 EME and weak-signal SSB
144.140 WSJT FSK441/JT44 calling frequency
144.110 to 144.160 WSJT FSK441 or JT44 (around this area)
144.131 PropNet <http://www.PropNET.org>(with +1500hz PSK audio)
144.150 SSB PSK/HELL/MFSK16/SSTV
144.200 National SSB calling frequency
144.20-144.30 General SSB operation, upper sideband
144.275-144.300 New beacon band
2 Meters FM Digital modes
145.500 SSTV (National SSTV Simplex FM Frequency)
145.550 FM PSK31, Hellschreiber

70 Centimeters CW/SSB/Digital

420.00-426.00 ATV repeater or simplex with 421.25 MHz video carrier control links and experimental
426.00-432.00 ATV simplex with 427.250 MHz video carrier frequency
432.00-432.07 EME (Earth-Moon-Earth)
432.07-432.08 Propagation beacons (old band plan)
432.08-432.10 Weak-signal CW
432.100 70 cm calling frequency
432.11-432.20 WSJT JT44/FSK441 ?
432.150 SSB PSK
432.10-433.00 Mixed-mode and weak-signal work
432.30-432.40 New beacon band
441.000 Packet Calling Frequency

CONTEST CORNER

ARRL 2017-2018 Contest Dates - Ver 1.0c, 17 Oct 2016

January 2017 1 Straight Key Night 7 Kids Day 7-8 RTTY Roundup 21-23 January VHF	February 2017 13-17 School Club Roundup 18-19 International DX – CW
March 2017 4-5 International DX– Phone	April 2017 16 Rookie Roundup – Phone
June 2017 10-12 June VHF 18 Kids Day 24-25 Field Day	July 2017 8-9 IARU HF World Championship
August 2017 5-6 222 MHz and Up Distance Contest 19-20 10 GHz & Up – Round 1 20 Rookie Roundup – RTTY	September 2017 9-10 EME - 2.3 GHz & Up 9-11 September VHF 16-17 10 GHz & Up - Round 2
October 2016 17-21 School Club Roundup 22-23 EME - 50 to 1296 MHz	November 2016 5-7 Nov. Sweepstakes – CW 19-21 Nov. Sweepstakes – Phone 19-20 EME - 50 to 1296 MHz <i>November 2017</i> 4-5 EME - 50 to 1296 MHz 4-6 Nov. Sweepstakes – CW 18-20 Nov. Sweepstakes – Phone
December 2016 2-4 160 Meter 10-11 10 Meter 18 Rookie Roundup–CW <i>December 2017</i> 1-3 160 Meter 9-10 10 Meter 17 Rookie Roundup–CW

DID YOU KNOW?

You know what RST signal codes are, right? But did you know that RSQ-Codes exist for Digital communications?

Well, here is a list of them for your knowledge base and to dazzle your friends compliments of WIKIPEDIA. See all the other Q-Codes for CW/SSTV/SSB as well as some other good info at: <http://www.amateur-radio-wiki.net/index.php?title=Codes and Alphabets>

RSQ code: Often used to describe reception and quality of digital modes such as PSK31.

RSQ Code Commonly Used by Radio Amateurs

Number	R - Readability	S - Strength	V - Quality
1	0% copy - undecipherable	barely perceptible trace	splatter over much of the spectrum
2	20% copy -occasional words distinguishable	not used	not used
3	40% copy - readable with difficulty, many missed characters	Weak trace	multiple visible pairs
4	80% copy - Readable with no difficulty	not used	not used
5	95%+ copy - Perfectly readable	Moderate trace	One easily visible pair
6	not used	not used	not used
7	not used	Strong Trace	One barely visible pair
8	not used	not used	not used
9	not used	Very strong trace	Clean signal - no visible unwanted sidebars

COMPATIBLE VS COMPLIANT

Carrie Higbie Profile: [Carrie Higbie](#)

Standards are there for a reason. They are a least common denominator for all things to work and play well with others in the same standards arena. For years, some companies come out with compatible cable, electronics, etc. It is important to note that there is a HUGE difference between the two for the end user. Compatible typically means that the products will work but there is something that keeps them from being fully compliant. In open systems, this can mean a wasted investment as compatible products will be the first any vendor points to if the system doesn't work.

There is not a "compatible" industry accepted testing. Compatible is the vendor telling you their product should work. The variance between compatible and fully compliant could certainly lead to issues down the road.

It is fine for a company to exceed the standards, and in fact, in some cases there are advantages there. But any product that you plan to have in your data center should be compliant with the standards supporting what you expect to have in the environment.

Ref: <http://itknowledgeexchange.techtarget.com/data-center-ecosystem/compatible-versus-compliant-buyer-beware/>

DON'T TAKE THE GROUND FOR GRANITE (PUN)

The following statements taken from the ARRL Web Site.

After antennas, station grounding is probably the most discussed subject in amateur radio and it is also the one replete with the most misconceptions. The first thing to know is that there are three functions served by grounding in ham shacks:

1. Electrical Safety
2. Stray RF Suppression (or simply RF Grounding)
3. Lightning Protection.

Each has its own set of requirements, but not all station setups need every kind of ground. In fact, some setups don't use a ground at all!

Refer to the ARRL web page <http://www.arrl.org/grounding> for more information.

WHAT IS SWR

Excerpt from ARRL Article "Understanding SWR by Example"

<http://www.arrl.org/files/file/Technology/tis/info/pdf/q1106037.pdf>

What is SWR? SWR is sometimes called VSWR, for voltage standing wave ratio, by the technical folks.

Okay, but what does it really mean? The best way to easily understand SWR is by example. In the typical ham station setup, a transmitter is connected to a feed line, which is then connected to the antenna. When you key the transmitter, it develops a radio frequency (RF) voltage on the transmission line input. The voltage travels down the feed line to the antenna at the other end and is called the forward wave. In some cases, part of the voltage is reflected at the antenna and propagates back down the line in the reverse direction toward the transmitter, much like a voice echoing off a distant cliff. SWR is a measure of what is happening to the forward and reverse voltage waveforms and how they compare in size.

OWN A PET?

Got Pets? Dogs, Cats, Rabbits, Llamas or ???

Keep this number handy, in your speed dial or on your wall calendar!

MEMBER ACTIVITIES

Bryan KM4PEB receiving the 1st EXTRA upgrade certificate from VE Steve K4ELI & the VE Team

Bryan KM4PEB and the VE Team
Steve K4ELI, Larry K4LDC & John W4TXA

Wonder boy, Chris KM4ZJ, did his Tech, Gen, and Extra in about an hour. Test Team (L-R) WB3ILX, K4ELI, W4TXA, W4DTO, K4LDC, & K4TXA

K4ELI and the VE Team will be testing on Dec. 1 at 7pm at Burnt Hickory Baptist Church, Due West Road, Powder Springs.

All classes of licenses will be available.

BRING:

- Original and copy of existing license.
- Copy of FRN # if you have a GMRS license or some other license.
- \$15 cash----exact change
- Photo ID

See the ARRL web site for more details.

Start of W4TXA & K4TXA's new tower installation.

**Breakfast at Tiffany's? No! This was an *Emergency*
BoJangles Fix!**

Thanksgiving Day pre-empted our weekly breakfast at BoJangles, so our Breakfast was rescheduled. Fortunately, Henrik KE8AYN was visiting from Michigan and was able to join us. Around the table, (L-R) W4TXA, K4DMF, K4CGA, WB3ILX, KM4PEB, K4LDC, KE8AYN & K4ELI. In the booth to the left is Helen, KA4JMV.

EDITORS NOTE:

Lee, WB4QOJ, is currently unable to continue publishing the SCARS Newsletter due to some family issue requiring a majority of his time.

I will take over the Newsletter duties on a temporary basis for Lee. Please send me any ideas or information you would like to see included in the Newsletter. I plan to publish on a quarterly basis starting in January 2017. Please bear with me.

Thanks to Lee for all he has done in the past.

73's Chuck, K4CGA
