

## The Prez Sez

Now, just hours after our second event for the year, I look back on this year's Field Day, with much joy. We had, not only great participation from our membership, but we also had quite a bit of public viewing... This is so important to show to the world, or should I say; to our corner of the world, what Ham Radio is all about. In recent times, we now have had, the "242" Special Event, The "Silver Comet Trail - W4T" Special Event, and last week-end, the 2018 Field Day. All, very successful. and, again, I will ask our members, if there are any other special events, or just "regular" stuff that they would like to see our club engage in.

As we move into the summer and fall seasons, our club is now starting to give directly, ARRL "VE" Testing Sessions at the Paulding County Chamber of Commerce. So I invite any and all of the club's VE's to participate in the July 10th testing session. This will be a regular activity on the second Tuesday of each month at 6:30 PM (local time). Any of you General Class; Advanced Class, or Amateur Extra Class members that would like to become VE's (Volunteer Examiners), please contact me at a meeting. Everyone is invited and welcomed!

John Reynolds, W4TXA  
President – Silver Comet Amateur Radio Society

# **W4RSC "Radio Silver Comet"**

**The Silver Comet ARS Inc. a 501 (c) (3) Not for Profit Organization**

## **Editor's Notes:**

June was another busy month for the club and your editor with all the events and contest. I blew it May's edition, please correct Mike Carroll's call sign to K4ZEC observing KM4ZMW in the picture caption. It is not KN4FVA as published. Please enjoy this newsletter and email any pictures or articles for publication prior to the 25<sup>th</sup> of each month. The earlier the better since I start working on the latest newsletter immediately after publication of the last one.

Chuck K4CGA, Editor

## **Club Shirts!**

With lots of club activities scheduled for the months ahead, don't forget to order your SCARS logo'd shirts now. Wear your call sign proudly and help SCARS grow by displaying the club logo. Tee's and Polo's are the in-thing. See Rick KM4ZMW for order forms and help in placing your order. I got mine, do you have yours?

## **Monday – "SCARS Night Out" Net!**

Just a quick reminder of Monday night's net. Please check in if you get a chance and participate in discussions on just about any subject you choose. Check-in begins at 8:30PM. Look forward to hearing from you.

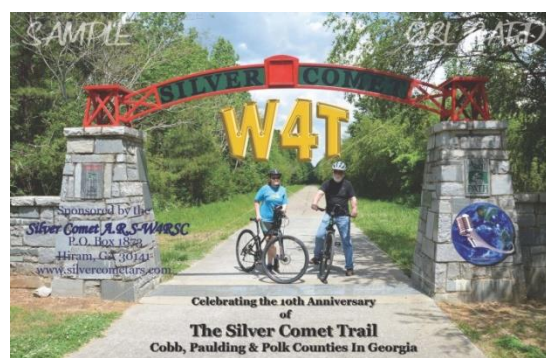

**73's David Walck – K4BBH**

## **SCARS Community Food Drive**

**How can SCARS help?** Let's keep up the good work and help fight hunger in our community. Please continue to bring an item or two to our monthly meetings. These items will be delivered in the next couple of days to one or more of the local community food banks for distribution to those in need. Remember, this is voluntary. We will not take your birthday away unless you want us to.

## **“W4T” - Special Event - UPDATE!**

The SCARS “**W4T On-The-Air**” Special Event celebrating the 10<sup>th</sup> Anniversary of the completion of the **Silver Comet Trail** was a resounding success. Amateurs around the world now know what “**Silver Comet**” stands for: *The Silver Comet ARS* & the **Silver Comet Trail**.

The Special Events Committee thanks the entire club membership for their support and suggestions and especially those that directly participated in our events.

Here is the final tally: **3,060** Logged Contacts, **12,660** Look-ups on QRZ.com.

Our final “On-The-Air” was held at the Rockmart Trailhead in the Seaborn Jones Park, on June 2<sup>nd</sup> & 3<sup>rd</sup>. Three stations were setup and operating by 8:30am with the 4<sup>th</sup> station set up about an hour later. The 4<sup>th</sup> station was setup and ready to go if necessary. Antennas consisted of 2-G5RV JRs, a 20/40mtr Dipole and a 31’ Vertical w/counterpoise.

The weather was hot and humid with a few storms off in the distance. It was partly cloudy and partly sunny. There was very little foot/bike traffic in the park and even less stopping by to see what we were all about. Those that did stop by were quite amazed by what we were doing and were very supportive of our efforts.

Combined with the extremely poor band conditions and decreased contact count, it was decided to wrap up early, and resume participating from our individual home stations the rest of the day which lead to a substantially increased contact count.

Sunday’s operation from the park was cancelled in favor of home station operation since that seemed to produce more contacts and was definitely more comfortable.

Here are some pictures taken at the Rockmart Trail Head:

John - W4TXA calling CQ w/Mary (K4BBH xyl)

Dave - K4BBH chatting with a bicycle visitor

Main Pavilion - Rockmart

See if you can find the 4 antennas!

# ARRL Field Day 2018 – W4RSC Style

This year's event was again held at the Ben Hill Strickland Sr. Park, Pavilion#2, in Hiram, Ga. We thank you City of Hiram, for allowing us to use this great facility.

The SCARS Field Day Committee wishes to thank all the SCARS & W4IBM Radio Club members that participated our 2018 Field Day event making this another successful and fun year. Your assistance in setting up, tearing down, providing equipment, antennas, accessories and operating time was invaluable and greatly appreciated. We hope you enjoyed yourself and plan on doing it again next year.

## **W4RSC Statistics for this year's event are:**

**Total Contacts** = 328 = SSB = 277 FT8 = 51

### **Total Contacts by Call sign:**

Initials	Total	%
-----	-----	---
K4CGA	138	42
KM4ZMW	51	16
KM4IKO	46	14
K0CZR	35	11
K4TXA	18	5

# ***Towers, Towers, Towers!***

Well, apparently this is the year to either put up or tear down a tower or both.

Several of our club members have been actively assisting the estates of Silent Keys in removing towers and antennas. Kudo's! My sincere thanks are extended to those that have participated in those activities. Unfortunately, it is a necessary evil of our hobby and may affect us too someday.

Many of our SCARS club members have purchased used towers and plan to relocate them to their home QTH, or move their existing tower to a new QTH.

Other members like me, your editor, may get around to putting up the towers we have laying around somewhere out back. Hopefully, this will be my year.

Some members may just want to buy a new tower. Read the specifications thoroughly and ask around. Choose carefully.

Whatever, your decision may be, please *BE CAREFUL*. Here are some pictures of our club members hard at work.

Hard at work! "When is the Helicopter arriving?"  
KF4OUS, K4ELI, KM4IKO & K4ZEC

John – K4SSE disassembling the tower and antenna

K4ZEC, K4SSE & K4ELI

James-KM4IKO & Nick (K4SSE's son)

Janet – KN4JVC  
“Just another one off the bucket list”

If I can't get the jacks up, you can keep it!

Why does the top piece take 3 men to move it?

## *Meet a club member – K4ELI*

When I was 10-12 (late '50s), two of my first cousins got their licenses. Tommy K4FMO—same age as me (several of you have met him at hamfests), and his older brother Tony K4YTO. They lived in Oxford, Ala, too far away from Carrollton to help me do likewise.

Thus was the ham radio seed planted. AETV, yes that is Alabama and Education all together—grin, had a ham radio program on Channel 7 from Mt. Cheaha. In Carrollton, it came in better on the back of the 'lazy H' than the Atlanta big 3 on the front (Ch. 2—5—11).

I learned LOTS of theory there, enough to pass the novice test, and a bit of code but not enough. I had no one to help with the code at that time. The interest continued, but there was no gain made toward a license. I read every book on electronics, transistors, radio, etc. that was in the Carrollton library---most of them several times. The Olsen Electronics store in the 200 block of Peachtree Street (think old junky dark surplus store) and the Allied Radio Catalog were my sources of the parts and pieces I played with back then. The Allied catalog had ALL the ham gear listed back in the day. Many hours of wishful thinking with that book in hand.

My first hand book was a 1963 model, probably bought with my first earnings from the grocery store bag boy job. If that book were a car, it would have 479,000 miles on it. It is WELL-USED.

There were a couple of adult hams who's path I crossed during those early days that helped keep the interest alive, but no real help for licensing.

Fast forward thru HS, Colleges—2 of them---another story, 1969-marriage and first REAL job in Tenn., a move back to Marietta in 1974, and a job with Ga Power.

Somehow in 1975, I have no clue how, I found out about a Novice class in Atlanta. Cal Neff K4JSR-SK was store manager for the Lafayette Radio store (think Radio Shack) on West Paces Ferry Rd., just a bit west of P-Tree Street. He taught the class after closing.

Spring of 1975, I'm in a novice class, relearning theory, and learning the code. It was a light weight victory day when I passed the 5WPM test, and easily passed the written Novice test.

The first call was WN4AJT came in July 1975, and was good for 2 years. I updated to Technician in Nov. 1976. Before that, the FCC dropped the 'N' prefix calls, and converted my Novice call to WB4AJT. I cannot find the date that happened. I have the license; there is no date on it.

Blood, sweat, tears and a year later, I managed to pass the 13 WPM test down on Peachtree Street in the FCC offices. ----First MAJOR Euphoric ham radio moment. I don't remember what floor or building, I do remember your knees started knocking with fear when you stepped thru the door off Peachtree Street.

'Ole Angelo Ditty, FCC Manager, FEARED by all, and (sort of) revered by a few, and his gang, all wearing the 'uniform of the day', black pants, white long sleeves, and a skinny black tie, asked if I wanted to take the Advanced written test. I was in shock at passing the 13wpm, and did not do well with the Adv. I did succeed later with the advanced test.

Went thru any number of radios, novice rig was a Heath DX-60 and a Drake R4A, maybe 3-4 CW Qs on that setup. When Gen and Adv came along, the rigs came and went. There was a Swan 350—that was BIG talking ---350watts, and an assortment of other stuff till the Drake “B” line twins came along--great radio set. Traded them for the first new Transceiver I had, Icom IC-745 in the mid-80s. I just sold it a few months ago.

In 1975 I joined the Atlanta Radio Club, and the Kennehoochee club had great fun and met some great folks, you know one of them, my buddy Wyatt WA4VMF. We are kind of the last two standing from a gang that hung out together in the late 70s—mid 80s.

Kids and life happened; by the late 80s activity slowed down, and stopped early 90s.

In 2007 I retired from GPC, and we moved to Dallas in 2008. Once our stuff was sort of set in place, I started to get the radio itch again. Looked around and went to a couple of PARC meetings, don't need to say any more there----grin. Found the Silver Comet gang---all 5-6 of them in 2010-11 and have been member ever since.

In 2011, I applied for and received the vanity call K4ELI, and in 2014 I passed the Extra exam. The EXTRA exam----EUPHORIC Event #2 in my ham radio life.

Antennas, radios, and activities have picked up and I am currently pretty active.

I got VE credentials from ARRL in late 2015, and started testing in 2016. At this time I have participated in testing over 300 folks.

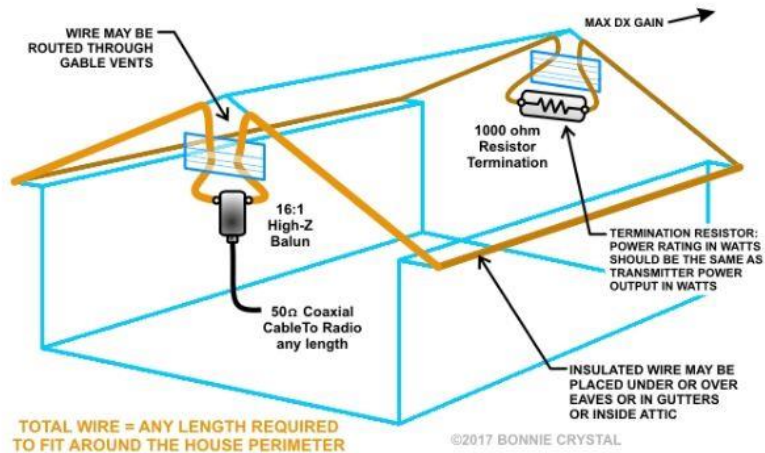

The VE activity, the 2 Elmer Awards I have received, and thanks from those I Elmer, are the things I'm most proud of in my 43 year ham radio life.

# Deed Restrictions Still Got You Down?

## Broadband Butterfly Terminated Dipole Antenna (BBTD) House Roof Version 1.8 MHz to 54 MHz SWR <2:1

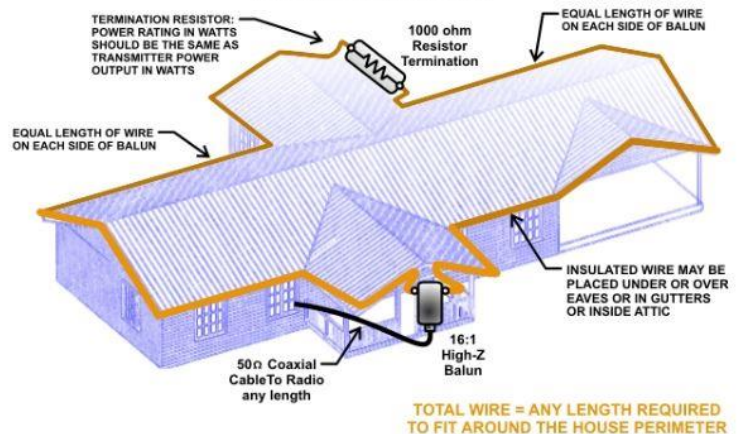

### About the BBTD Antenna

The Broadband Butterfly Terminated Dipole antenna (BBTD) was invented by Bonnie Crystal (KQ6XA). It is a type of traveling wave antenna, similar to a terminated folded dipole antenna (T2FD or TFD). But, the BBTD antenna is constructed of triangular or irregularly-shaped elements, instead of narrow rectangular elements

# **GEMA/MCV Exercise – May 2018**

*By James Akey, KM4IKO*

As you know SCARS is a club that is fortunate to have several long time Amateur Radio Guru's which means our club can offer many areas of interest.

One of the areas I personally am interested in is A.R.E.S.

I joined SCARS in the spring of 2015 after becoming a HAM. Later that year I joined A.R.E.S. and participate in the Thursday evening net as Net Control once per quarter which I enjoy. This year I was asked to attend the annual GEMA/MCV exercise held at Lake Lanier.

This was an exercise that brought together many agencies from all over Georgia and a few from other states. There were representatives from law enforcement, fire departments, emergency services, 911 call centers and amateur radio. Teams were organized; I believe there were a total of six teams.

We (Paulding Co. A.R.E.S.) were a part of team three. Our team consisted of representatives (police and fire departments) from Bryan Co., Jeff Davis Co., and Gordon Co., plus Paulding Co. EMA, Bartow Co. and Paulding Co. A.R.E.S.

Day one was setup day, days two and three were work days and day four was review and take down, pack up and go home.

During days two and three we were assigned various tasks to perform. It was an interesting exercise and I learned a lot.

If you are interested in learning more about A.R.E.S. please contact me, I will be happy to share what information I have. Also, many of SCARS members are also A.R.E.S. members.

## Trivia (maybe Trivial)!

Is this a new type of antenna? Prototype? Stealth? Wonder what the power and SWR is like.  
Hmmm.....

---

*"You see, wire telegraph is a kind of a very, very long cat. You pull his tail in New York and his head is meowing in Los Angeles. Do you understand this? And radio operates exactly the same way: you send signals here, they receive them there. The only difference is that there is no cat."*

--Albert Einstein, when asked to describe radio.

Inventor of the Single Wire Telegraph  
and co-Inventor of the Morse Code

# ***DX Code of Conduct***

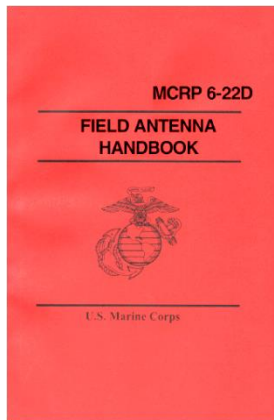

- I will listen, and listen, and then listen again before calling.
- I will only call if I can copy the DX station properly.
- I will not trust the DX cluster and will be sure of the DX station's call sign before calling.
- I will not interfere with the DX station nor anyone calling and will never tune up on the DX frequency or in the QSX slot.
- I will wait for the DX station to end a contact before I call.
- I will always send my full call sign.
- I will call and then listen for a reasonable interval. I will not call continuously.
- I will not transmit when the DX operator calls another call sign, not mine.
- I will not transmit when the DX operator queries a call sign not like mine.
- I will not transmit when the DX station requests geographic areas other than mine.
- When the DX operator calls me, I will not repeat my call sign unless I think he has copied it incorrectly.
- I will be thankful if and when I do make a contact.
- I will respect my fellow hams and conduct myself so as to earn their respect.

## *Recent SCARS Website Updates:*

<http://www.silvercometars.com/index.php>

- No recent updates to report!
- 2018 Field Day and other pictures will be added soon.

Send SCARS website corrections, comments, or suggestions to K4LDC (Larry) at [K4LDC@arrl.net](mailto:K4LDC@arrl.net)

## *On the Down Side:*

The club wishes to express it's condolences to family of Bobby O'Donald KD4ISM for the loss of his father-in-law Homer Joseph Ashley.

The club wishes a speedy recovery to Anne McDaniel N4JLI, wife of Lee WB4QOJ, who is suffering from some recurring medical issue.

The club also wishes a speedy recovery to the Arm-of-the Month Club members suffering from shoulder injuries: Everett-KM4EOG, Dave-K4BBH, Dave-K4DMF & all the others who refuse to admit it.

The club wishes a speedy get-well to Rick KM4ZMW who injured his hand and back after flopping like a fish on Field Day. Look where you are going Rick.

The club wishes a speedy recovery to Steve K4ELI, who has to read this because he has trouble hearing due to severe ear problems.

To those that I have missed in this issue, please rest assured that the club and its members wish you and your family's speedy recovery from whatever the problem may be.

## Breakfast @.....

The "Official" Breakfast Joint of  
*The Silver Comet Amateur Radio Society*

**Come Join Us!**  
**Thursday mornings**  
**Around 8:30 - 9am +/-**  
**Until ??????**

**Located on Hwy 278 in Hiram between  
the Goodwill and Racetrack across from  
the Home Depot.**

**Show them your Greystone Connections Card for a  
discount.**

### ***Is it time for a location change?***

Several members have suggested we consider a new location for our weekly breakfast. What do you think?

Do you know of a place that can accommodate 10-20 members for about 2hrs, has good food, good service, is centrally located & reasonably priced?

Please contact K4CGA, K4ELI or W4TXA with your suggestion or bring it up at the next club meeting. Thank you!.....K4CGA
